## N A T U R A L B I R C H

Above are photos showing some of the range of Natural Birch veneer with a clear finish.

Below are photos from a project specified as Natural Birch with clear finish. These doors are installed in the same building.

### NOTES ABOUT SPECIFYING NATURAL BIRCH

"Natural" allows any and all amounts of Sapwood (white) and Heartwood (red/brown) within a face as well as across the scope of the project.

No effort is made by the manufacturer to sort for color consistency - this is true for both A and AA Grades.

Pair matching is only applied to individual openings - other pairs in a room may not match.

If color consistency is required on a project, consider selecting White Birch.
